Section 01

Partner enablement overview

The partner enablement landscape

Build the capability · Prove it

START HERE

Anthropic Partner Academy

Self-paced e-learning across Claude products, use cases, and skills, including the certification tracks.

Partner-only access · self-paced

OPTIONAL ACCELERATOR

Partner Basecamp

Hands-on in-person training in small cohorts. An intensive deep-dive, not a first stop.

Invite-only

ALWAYS ON

CPN Connect

The monthly partner broadcast: program, product, and model updates.

Monthly

→

THE CREDENTIAL

Claude Certifications

Proctored, credentialed exams across the Associate, Developer, and Architect tiers.

Three tiers · from $99 · valid 12 months

PARTNER BADGE

Claude Code Partner Badge

A specialty badge recognizing partner capability with Claude Code.

Free

Three tracks across a Claude engagement

Engagements run through pre-sales, **delivery**, and post-sales. This deck covers **Delivery**, where all four certifications sit today.

PRE-SALES | **DELIVERY** | POST-SALES

DELIVERY SUB-TRACK	IF THEY…	CERTIFICATION	
Consultant	Manage, analyze, or advise on the engagement without writing code	Associate – Foundations	
Developer	Write code that calls Claude, such as apps, agents, pipelines, and integrations	Developer – Foundations	
Architect	Design and own the technical solution for a client	Architect – Foundations, then Architect – Professional	 then 
Forward-deployed engineer	Build on site with the client and make the case for the solution	Developer – Foundations and Architect – Foundations	 & 

Demonstrate Claude expertise to your customers

	Claude Certified **Associate** non-technical	Claude Certified **Developer** Builds on Claude	Claude Certified **Architect** Design solutions
Foundations Validates that someone can perform the role's core tasks with Claude competently.	Launched Jul 2026 **$99**	Launched Jul 2026 **$125**	Launched Mar 2026 **$125**
Professional Validates that they can own the outcome end to end, exercising judgment across the full lifecycle without oversight.	—	—	Launched Jul 2026 **$175**

FORMAT

120-minute, scenario-based exams with multiple-choice and multiple-response questions.

DELIVERY

Proctored by Pearson, online or at a test center. Results reported immediately as pass or fail.

EXAM PREP

Free self-paced courses on Partner Academy. Recommended, but not required: there are no prerequisites for any exam.

VALIDITY

Every credential is valid for 12 months. Digital badges issued through Credly.

CRN TIER

Only the Developer and Architect certifications count toward a firm's CPN tier.

Section 02

Enablement by role

The learning and certifications available for each delivery role.

Consultant

DELIVERY TRACK

Who it's for

Project and engagement managers, business analysts, product managers, designers, and consultants. Anyone on the engagement who does not write code.

Consultants who start writing code can move to Developer.

LEARN

Claude Cowork product guide | Cowork enterprise deployment guide

AI capabilities and limitations | Product webinars | Claude Code 101

CERTIFY

Claude Certified Associate – Foundations

Live Jul 8 | $99

What the exam covers Everyday, practical use of Claude. Prompt effectively, evaluate and refine output, select the right product and model, integrate Claude into existing workflows, set up Projects and knowledge sources, apply responsible AI and governance principles, and troubleshoot when something goes wrong.

Associate – Foundations prep course | Associate – Foundations exam page

Developer

DELIVERY TRACK

Who it's for

Software developers and data, ML, and platform engineers. Anyone who builds, integrates, and ships production applications and agents that call Claude.

Developers who start owning the design can move to Architect.

Partner Basecamp Invite-only, hands-on training in small cohorts, before or after the exam. It assumes Claude Code experience from the Academy courses. Ask your partner team about a seat. **Details →**

LEARN

CPN Learning Path

Covers the Claude API, MCP, agent skills, and Claude Code in Action

Claude Platform 101

Claude Code 101

CERTIFY

Claude Certified Developer – Foundations

Live Jul 8 $125

What the exam covers Hands-on building with Claude. Integrate the Claude API, build agents and workflows, configure Claude Code, engineer prompts and context, evaluate and debug outputs, select models and optimize cost, build custom tools and MCP servers, and apply security and safety practices.

Developer – Foundations prep course

Developer – Foundations exam page

Architect

DELIVERY TRACK

Who it's for

Solution architects, principal engineers, and technical leads. Anyone who sets the technical direction for a client.

Architects start with Foundations, then move to Professional.

Partner Basecamp Invite-only, hands-on training in small cohorts, before or after the exam. Ask your partner team about a seat. **Details →**

LEARN

- Introduction to subagents

CERTIFY | Live Mar 2026 | $125

Claude Certified Architect – Foundations

What the exam covers Applied architecture with Claude. Design agentic architectures and orchestration, design tools and MCP integrations, configure Claude Code workflows, engineer prompts and structured output, and manage context for production reliability.

- Foundations prep courses
- Foundations exam page

CERTIFY | Live Jul 8 | $125

Claude Certified Developer – Foundations

What the exam covers Advanced architecture at scale. Design enterprise solutions, apply model selection and context engineering, architect integrations, evaluate and optimize systems, apply governance and risk management, manage stakeholders across the solution lifecycle, and enable developer productivity and operations.

- Professional prep course
- Professional exam page

Forward-deployed engineer

DELIVERY TRACK

Engineers who build on site with the client and make the case for the solution. Partners staff this role today, and it combines the Developer and Architect sub-tracks with use-case content.

FROM DEVELOPER

Developer – Foundations

Covers the build work with the Claude API, tools, MCP, agents, and Claude Code.

+

FROM ARCHITECT

Architect – Foundations

Covers the build work with the Claude API, tools, MCP, agents, and Claude Code.

+

FROM ARCHITECT

Architect – Professional

Covers the build work with the Claude API, tools, MCP, agents, and Claude Code.

+

BUSINESS CONTEXT

Use-case content

Covers the build work with the Claude API, tools, MCP, agents, and Claude Code.

Certify Take Developer – Foundations first, then Architect – Foundations, then Architect – Professional. Prep courses are on the prep course page.

Partner Basecamp Invite-only, hands-on training in small cohorts, before or after the exams. Ask your partner team about a seat. **Details →**

Section 03

Resources

How to register for an exam

RESOURCES

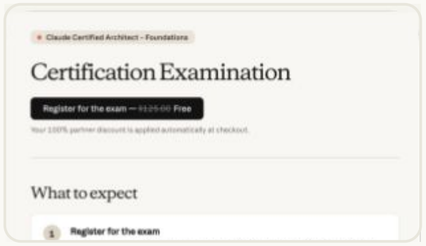

Register on the Anthropic Partner Academy, then schedule with Pearson.

1

Open the exam page

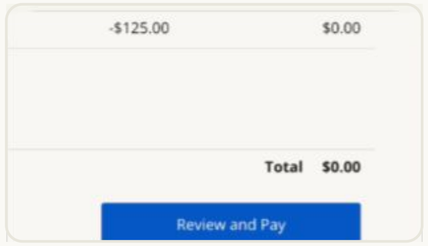

Each exam has its own Academy page, with the guide, policies, and free prep courses.

2

Register for the exam

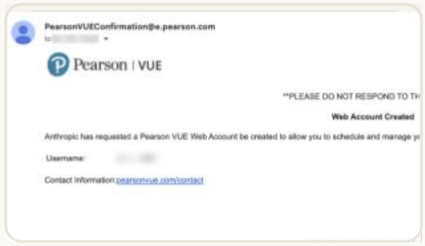

Sign in with your company email. Your partner tier discount applies automatically.

3

Review and pay

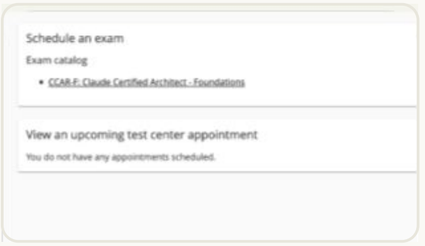

Confirm your order, then click Review and Pay to complete registration.

4

Watch for two emails

First registration only: Pearson sends your username and a temporary password. Check your spam folder.

5

Schedule your exam

Sign in to Pearson, then pick your exam under Schedule an exam.

Your first Pearson sign-in includes the candidate agreement, a new password, and security questions. For any later registration, sign in to Pearson with your existing login — your exam will be waiting to be scheduled. On exam day, bring a government-issued ID matching your registration name.

Frequently asked questions

How long is my certification valid, and how does renewal work?

Every credential is valid for 12 months from the day you pass. To recertify, you review what has changed since you certified and complete a free, non-proctored assessment on the Anthropic Partner Academy.

What happens if I do not pass?

An escalating cooling-off period applies: 14 days after your first attempt, 30 after the second, 90 after the third, capped at four attempts per rolling 12 months. Any attempts before June 30 are reset and do not count.

Where do I go for help with an exam?

Pearson is your first stop for anything exam-related: registration, scheduling, appeals, and exam-day issues. For badge questions, contact Credly support.

What happens if my name doesn't match my ID at check-in?

Your Pearson VUE profile name must match your government-issued ID exactly — this is confirmed during scheduling and in your confirmation email. If you notice a mismatch, request a correction from certifications-support@anthropic.com before your scheduled exam.

How do I retake an exam?

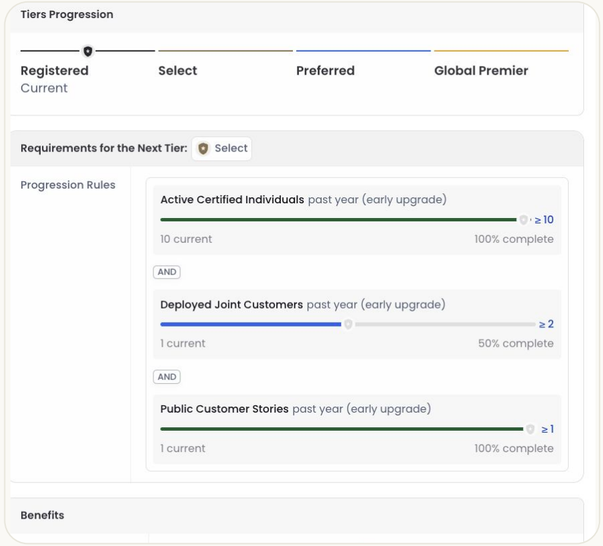

Register for the exam again in Anthropic Partner Academy. Once your registration is complete, a link appears in Pearson to schedule your exam. Pearson limits the dates you can select based on the required waiting period between attempts.

How long do I have to take the exam after I register?

Once you register for an exam, your registration is valid for 5 years. You can schedule and take the exam at any time within that window.

CONFIDENTIAL

Seeing your team's progress

TODAY

Certifications roll up to your organization's totals in Partner Portal, updated weekly.

COMING

We're working on a detailed certification view for each partner. Details and timing will be available soon.

Five ways partners embed certification

1

Add it to onboarding

New hires complete their track, exam included, as part of the onboarding checklist you already run.

2

Use bench time

People between projects start their Claude track first. Resource managers already do this with cloud certifications.

3

Recognize certification

Add Claude certifications to the recognition and incentive programs you already run for cloud and data platform credentials.

4

Run certification drives

Pick a 30-day window and recognize everyone who certifies inside it. Ask your partner team about support for your first one.

5

Pair a drive with expert time

Ask your partner team about a recurring Anthropic Q&A while the drive runs, for questions the self-paced content does not answer.

We suggest starting with one track and one cohort, then expanding from there.
